texture
shape

Key Facts/ Questions

What secondary or primary colours can you see in the pigeon?

What secondary or primary colours will you use when you do your print?

A line is a mark that is longer than it is wide. A line can be created using materials, such as a pencil, pen or a brush dipped in ink. A line can be straight or curved. It can be horizontal, vertical or diagonal and can change direction.

A shape is flat and is created by a closed line. The shape might be an outline or filled in with solid colour, shading or a pattern. Shapes can be geometric, like squares or triangles. They can also be irregular or natural shapes, such as puddles or leaves.

Texture refers to the surface quality of something and the way it feels. Actual texture really exists and you are able to touch it, e.g. the texture of different fabrics in a collage.

Learn How To

To improve their mastery of art and design techniques: drawing with pencils or pens.

To improve their mastery of art and design techniques: drawing a print design & creating a collage.

To improve their mastery of art and design techniques: drawing a print design & creating a collage.
